DJ Series Brochure v2

Accessories

Universal Monitor (also avail in ivory)

For replacement of the Universal Monitor on earlier installations where the monitor is not integrated into the room unit or the master. Same size as Medium Room unit.

Perspex Adaptor Plate (white or ivory)

Used to adapt deltacom unit to hole left by old system master unit. Can be custom made to any size.

External Camera with IR

Can be used in conjunction with an audio door unit as an alternative to a video door unit where the mounting position of the door unit and/or lack of night lighting makes the external camera with IR a better solution. Image above is an example only. Actual camera supplied may vary.

Canopies—Clear Poly Carbonate

Available in Medium Horizontal, Small Horizontal and Vertical. (Vertical suits both medium and small).

Loop Antenna for AM radio

Directional loop antenna for optimal AM radio reception. Normally mounted in the ceiling space. Can be ordered with optional 5 or 15m coax lead.

Deltacom Power Supply—Mini

Suitable for small audio only systems with up to 4 units connected.

Wall box

Used for allowing mounting of intercom units into brick walls. Available in small, medium and large.

Deltacom Power Supply— Standard

Suitable for larger audio and video systems.

Music Kit

Consists of a Music Jack Plate and Music Jack Lead. Allows you to plug your ipod, mp3, stereo etc. either directly into a music master or when used with the Music Interface Board, into a mini master or room unit. The music can be heard through the whole system.

Music Interface Board

Allows Music Kit to be used with a mini master or room unit.
